Notes from Administration

Please continue to monitor your health this fall. Do not come to school if you are ill.

Attendance

When reporting student attendance issues, including lates, absences and leave early, please call the **Attendance Line at 403-777-7360 and press extension 1.** Remember to spell the last name of the student and leave the reason for the absence, late or leave early.

ADMINISTRATION & STUDENT SERVICES

At Ian Bazalgette school, we have many resources to ensure that your student is supported for best success.

ATHLETIC SCHEDULE

Athletic Schedule

Badminton

Congratulations to our Gr. 8 Badminton Divisional Champions!

Badminton team practices will be continuing this week after school. Grade 6 & 9 Badminton Divisionals are next week. Please refer to the schedule below.

Wednesday, May 15th - **Grade 6's**

Singles & Mixed Doubles @ Ted Harrison

B&G Doubles @ Peter Lougheed

Thursday, May 16th - **Grade 9's**

Singles & Mixed Doubles @ Peter Lougheed

B&G Doubles @ Ted Harrison

Wednesday, May 22nd - **Grade 7's**

Singles & Mixed Doubles @ Ian Bazalgette

B&G Doubles @ Peter Lougheed

Please note that there are 2 locations per night.

Practice Times – Badminton & Touch Football

Monday

Grade 6/7 Badminton Intramurals @ Lunch (12:05pm-12:30pm)

Grade 9 Badminton Practice (2:45pm-4:00pm)

Tuesday

Grade 8/9 Badminton Intramurals @ Lunch (12:05pm-12:30pm)

Grade 6 Badminton Practice (2:45pm-4:00pm)

Jr. & Sr. Flag Football Practice (2:45pm-4:00pm)

Wednesday

Women's Wednesday @ Lunch (12:05pm-12:30pm)

Grade 7 Badminton Practice (2:45pm-4:00pm)

**Grade 6 Badminton Divisionals @ Peter Lougheed & Ted Harrison
(4:00pm-7:00pm)**

Thursday

Grade 7-9 Badminton Team Drop-In @ Lunch (12:05pm-12:30pm)

**Grade 9 Badminton Divisionals @ Peter Lougheed & Ted Harrison
(4:00pm-7:00pm)**

Friday

No School

CELL PHONES & LOCKERS

Cellphones - Away for the Day School

We are an “Away for the Day” school. This means that cell phones and electronic devices will be secured in backpacks (gr. 6) or lockers (Gr. 7-9) before the day begins and left there until lunch time and then secured again for the last periods of the day until the end of the day. Use of cell phones to be permitted in the classroom only when assigned and supervised by teachers.

Should you need to contact your child, please call the main office.

Lockers

We completed distribution of school lockers to students Gr.7-9. Students continue to be excited about having lockers.

Again, important reminders about lockers and locker use:

- a) Lockers are on loan from the school, and the school administration will have access to them at any time throughout the year.
- b) Locker combinations must be kept confidential (i.e. do not share a locker combination with others).
- c) The school is not responsible for losses from tote boxes or lockers so keep valuables at home.
- d) Students are expected to keep their belongings in the locker issued to them.
- e) To maintain efficient student movement in the hallways during class changes, locker use is prohibited in between class periods. Only in the morning before classes, at lunchtime, or after school, are students permitted access to their lockers.
- f) Teachers will not grant permission to students to get items from their locker if they forget items in their locker. Prepare for classes before they start.
- g) Students should not spend excessive time at their lockers prior to school or after school.
- h) Should individual students repeatedly violate the above guidelines, locker privileges will be removed.
- i) Only school locks are to be used. If lost, new locks can be purchased in the office (\$10.00)
- j) If you have any questions or concerns regarding the above guidelines, please contact our Principal, Mr. Steven Pike, at smpike@cbe.ab.ca

FAMILY TRIPS AND EXTENDED ABSENCE FORMS

We are receiving more requests for learning support from families wishing to travel. If choosing to travel during the school year when school is in session, please be aware of the following:

- The Calgary Board of Education believes there is a strong positive correlation between attendance and effective education.
- The Education Act excuses students from attending school due to illness or other unavoidable cause, religious holidays, suspension/expulsion, or permission from the Board. An absence outside of these exemptions will be recorded as an unexcused absence.
- Absences may affect a child's academic progress at school.
- Schools are not mandated to provide schoolwork for extended absence.

- It is parents/guardians' responsibility to review and support their child's learning.
- The cumulative effect of multiple extended school absences could result in significant gaps in a child's learning and achievement.
- Absences may affect a child's peer relationships at school.
- Make sure to notify the school and the child's teachers of leave of absence by filling in The Leave of Absence Form. This form can be found in the main office.

INDIGENOUS WAYS OF KNOWING, BEING, & DOING

Ian Bazalgette Staff acknowledges and supports the Truth and Reconciliation Commission (TRC) Calls to Action

Our actions will include but are not limited to the following:

- We will offer a locally developed course for all students that focusses on understanding and learning about the cultures and ways of our Indigenous people. Details to come soon.
- We will continue to use authentic resources such as knowledge keepers, Indigenous artefacts and learning from the land to assist in understanding stories that are essential in moving the reconciliation process forward.
- We will continue to offer professional development for staff and involve them in the conversation as we know the work is not only that of teachers, but the entire learning community.
- We will continue to have student voice present in the school, and it will be visible where we can all appreciate the varied and enriching stories, we all bring to learning.
- We commit to making relatives, honouring Indigenous Knowledges, and deepening our connections to land and place through the spirit of the drum.

Indigenous Education

Moose Hide Campaign Day – May 16

The Moose Hide Campaign began as a BC-born Indigenous-led grassroots movement to engage men and boys in ending violence towards women and children. It has since grown into a nationwide movement of Indigenous and non-Indigenous Canadians from local communities, First Nations, governments, schools, colleges/universities, police forces and many other organizations – all committed to taking action to end this violence.

Niihiyyat (Complementary Course)

Ms. Pearl visited the Niihiyyat class again this week and shared some of her personal story. She discussed the challenges Indigenous woman still face today. Ms. Pearl played a song on the traditional flute that represented giving and receiving Love. She also taught the students to drum on traditional hand drums and talked about the 4 sacred medicines. Later in the week, Ms. Shelagh discussed the inequities Indigenous women continue to face in Canada. The class discussed the meaning and intention of Red Dress Day. Ms. Shelagh read the powerful and sorrowful poem “*I am 10*” by Astokomii Smith. Students were then able to create a poem, painting or drawing that represented Red Dress Day. Student creations are displayed throughout the school.

Honouring Life

This week students in Niihiyyat students finished their Red Dress paintings and started to plan their Circle of Self project. Classes doubled up to attend “A Day with an Elder at The Confluence” field trip. Students were dropped off at the Central Library where they explored each floor to observe Indigenous art and artefacts. Students then walked to the Wolfe and Sparrow Statue to meet Elder Sheldon who introduced himself and invited the students to give an offering to the Bow River. Students explored the statue to see where Elder Sheldon had translated some of the information into Blackfoot symbols. Elder Sheldon shared his personal experiences with being forced to attend a Residential School. The group returned to The Confluence where Elder Sheldon shared the Blackfoot Origin Story and Sky Stories.

SCHOOL CLUBS

School Clubs at lunch:

SCHOOL/STUDENT FEES

The availability of rich learning opportunities that your child will experience this year depends on the collection of school fees. Parents will be receiving copies of their outstanding fees in the mail. All applicable fees are available to view and pay online through [MyCBE](#) Account. Payments may also be made in cash, debit card, or credit card in person at our Main Office. Families that would like to set up a longer-term fee payment plan are encouraged to contact our Main Office (slditlof@cbe.ab.ca).

STUDENT SERVICES

The Youth Employment Centre (YEC)

Youth between the ages of 15 and 24 access **FREE** career and employment services. Drop-in to the centre to speak to an Employment Counsellor.

Drop-in hours: Monday, Tuesday, Thursday, Friday 8:30 a.m. to 5 p.m.
Wednesday 8:30 a.m. to 6:00 p.m. (closed statutory holidays).

Location: [Alberta Trade Centre](#), 2nd floor, 315 10 Avenue SE, Calgary, Alberta, T2G 0W2.

AHS - Owerko Family Walk In Services for Student Mental Health

The Summit - Owerko Family Walk In Services - Centre for Youth Resilience

The walk in service provides urgent, non-emergent, immediate mental health services for children and adolescents aged 7-17 yrs. Parents and guardians of children 0-17 are welcome to access services at the walk in in connection to supporting their children's mental health.

This program offers Single Session therapy where clients and their families receive a one hour appointment with a family counsellor. While clients and their families are free to return for more sessions, they will not be assigned to a specific therapist.

At the end of their walk in appointment, those who may benefit from ongoing mental health services will be supported either through access to local Emergency Departments or calling Access Mental Health for potential referrals/recommendations.

The brochure is a vertical document with a light blue background. At the top left, there is a photograph of a modern, brightly lit interior space with yellow walls and blue furniture. Below the photo is the heading "Who We Are" in bold blue text. The text below this heading describes the walk-in service for children and adolescents aged 7-17, mentioning that parents and guardians are welcome. It also states that the program offers single-session therapy with a family counsellor. At the bottom of the text block, it mentions that clients may be supported through access to local Emergency Departments or by calling Access Mental Health. To the right of the text, there are three sections: "Phone:" with two numbers (587-534-7250 and 587-534-7221), "Location:" with the address (The Summit, Marian & Jim Sinneave Centre for Youth Resilience, 2nd Floor, 1015 17 Street NW, Calgary, AB T2N 2E5), and "Walk In Services Hours of Operation:" with daily hours (10:00am - 10:00pm) and a note about closed status on holidays. Below these sections is a blue circular icon with a white arrow pointing right, followed by the text "To learn more about walk in services and The Summit, visit: ahs.ca/thesummit". On the right side of the brochure, there is a large, stylized graphic of overlapping blue and white semi-circles. Overlaid on this graphic is the text "The Summit: Marian & Jim Sinneave Centre for Youth Resilience" in blue. Below this is the heading "Owerko Family Walk In Services" in large, bold, black text, followed by "Program Overview" in smaller blue text. At the bottom right, there is the Alberta Health Services logo (a green cross) and the text "Alberta Health Services". At the very bottom right, there is a white speech bubble with the text "If you are in crisis or require urgent medical attention, please contact 911."

Who We Are

Owerko Family Walk In Services
Program Overview

Alberta Health Services

If you are in crisis or require urgent medical attention, please contact 911.

We have a collaborative team that can best support your family.

Our team consists of your family and:

- Family Counsellors
- Registered Nurses
- Social Workers
- Admin Staff
- Clinical Supervisor
- Program Manager
- Spiritual Care
- Protective Services
- Peer Support

Your Journey with Us

No referral is required. Clients and families may access walk in services on their own or at the recommendation of their family physician, school, Emergency Department, or other community services.

Upon arrival, you/your family will complete a brief questionnaire to identify what has brought you in and how you hope walk in services can help. This information is reviewed by a Family Counsellor before a 35-45 minute meeting with you/your family. The Family Counsellor will normally leave for about 10 minutes following the initial meeting to consult with their team

and gather resources. The Family Counsellor will then return to meet with you/your family to provide recommendations and resources. If you would like a copy of the session recommendations and resources, a printout can be provided.

Service Details:

Average Duration of Care:
One hour

Average Response Time:
Clients will be seen on a "first come, first served" basis. Wait times will vary according to current demand. Please note that if arriving in the evening, there is a possibility that clients might not be seen if capacity for the day has been reached.

Cannabis Use and the Adolescent Brain

The Canadian Psychological Association has a clear position regarding the use of cannabis during adolescence, namely **cannabis use can disrupt normal adolescent brain development**.

The cannabis usage rate amongst youth ages 15 – 24 is two times higher than it is among adults, with 1 in 5 teens between ages 15 to 19 having used cannabis in the past year (Statistics Canada, 2016).

With the legalization of cannabis coming into effect Canada-wide on October 17, 2018, there has been a resurgence of interest in this area and many opposing ideas coming to light. Bill C-45, or the Cannabis Act, is independent of marijuana use for medical purposes, which requires a doctor's prescription to legally use cannabis products to manage a variety of health concerns. With the legalization of Cannabis many are wondering – what does this really mean? What are the implications? And, if you are a parent, how could this impact my child(ren)?

The Cannabis Act allows adults to purchase, possess, consume, grow, share and make cannabis in its various forms with specific restrictions and parameters. It is important to note that the Cannabis Act only applies to

adults over age 18 years (or 19 years dependent on province of residence), and there are protective factors for youth built into the Act. The intent of the Act is to continue to prevent youth from using cannabis. For a more in-depth discussion of the Act and protection of youth, please consult the Government of Canada's website.

What is Cannabis?

Cannabis is the scientific name for the hemp plant, and the wider term used for marijuana, hashish, and hashish oil. Marijuana is the most common form, which is the bi-product of dried leaves, flowers and stems from the hemp plant Cannabis Sativa. While there are hundreds of chemicals found in this plant, the two most notable ones are THC and CBD. THC is the chemical that affects the brain, often referred to as the “psychoactive” component, and is the mind-altering substance that gives people the “high” associated with use. CBD oil is the non-psychoactive ingredient that is being studied further and used mainly for medical purposes. Known medical benefits include reducing spasms associated with Multiple Sclerosis, pain control, anti-inflammatory effects, and improving appetite. Cannabis can be consumed in a variety of forms, the most common being dried leaves rolled into a cigarette (“joint”) or smoked in a pipe with water (“bong”), as well as more concentrated forms such as hash, wax, and oil which are also heated and inhaled, or brewed into teas or mixed into foods as “edibles”. Vaporizing (aka “vaping”) cannabis has become more commonplace over the recent years as well.

Cannabis Effects

According to Alberta Health Services, the effect a person experiences while using cannabis varies and depends on a number of factors. These include things such as the amount used, how the drug is taken, expectations and mood of the user, and the setting it is being used in. Effects can be felt within a few minutes (particularly if smoked) but take around an hour to fully develop, and a person typically feels the effects from 2 – 4 hours, but impairment can last for up to 24 hours.

- Short term:
 - Feelings of calmness, happiness and relaxation
 - Increased socialization and heightened sensations (colours, sounds, smells)
 - Increase in appetite
 - Problems with memory, learning, attention span, problem-solving
 - Distorted perceptions, judgment, balance and reaction time

- Body tremors, loss of motor coordination, increased heart rate, dry mouth, reddening of eyes, muscle relaxation
- Increase of anxiety or panic attacks and sometimes paranoia
- Long term:
 - Smoking cannabis damages the lungs and contributes to respiratory problems
 - Can lead to anxiety, personality disturbances, and depression
 - Less ability to focus and filter information
 - Verbal learning, memory and attention effects can last after use is discontinued
 - Lack of ambition and motivation, as well as reduced communication and social skills

Adolescents and Cannabis Use: Impact on the Developing Brain

It is now well-known that our brains continue to develop and mature up until our mid-20s. The active component of THC in cannabis is what directly acts on many areas of the brain – therefore the negative impact for teens can be significant. THC affects the prefrontal cortex, which is critical to higher-order cognitive processes including **executive functions** such as impulse control, working memory, planning, problem solving and emotional regulation – all areas that are rapidly developing during the teen years. Structural changes in the brains of youth who regularly use cannabis have been seen via Magnetic Resonance Imaging (MRI). These effects on a developing brain can be temporary or last permanently.

In a recent position statement published by The College of Alberta Psychologists (2017) it is noted that due to significant brain development continuing to occur, “those under age 25 should not use cannabis recreationally due to the many potentially harmful impacts on health, cognition, educational attainment and mental health” (CAP Monitor Issue 52, p. 21)

Drug and alcohol use in general, including cannabis, can lead to negative effects for adolescents. **The most important message is that teen’s bodies and brains are still developing so impact on neurological development can occur.**

- Substance use can interfere with a critical developmental stage of adolescence, that of emerging independence and establishment of identity, as well as emotional maturation.
- During the critical years of learning, cannabis use can weaken a person’s ability to concentrate as well as retain information.

- Heavy or chronic cannabis use negatively affects performance on measures that assess attention, working memory, verbal memory, and executive functioning (for example the Psychologists Association of Alberta reports a decreased IQ of 6 points as a cognitive effect).
- Judgement can be impaired, resulting in poor decision making, which can lead to a higher likelihood of engaging in risky behaviours (such as getting into a car with someone under the influence, driving while high, choices around sexual interactions, and more experimentation with others drugs and alcohol).
- Functional impairments that can result from dependence on cannabis include reduced academic performance, truancy, reductions in involvement in school and extracurricular activities and increased family conflict.

Cannabis Use and Mental Health

What are the unique risks of cannabis use for youth?

Trying cannabis is unlikely to cause serious problems, but even occasional use has harms. Youth who use cannabis early and often for months or years are at risk of long-term health and social problems.

Here are a few examples:

- *Increased risk of harm to the brain – such as problems with memory, concentration, thinking, learning, handling emotions, and decision-making.*
- *Increased risk of mental health problems – such as psychosis or schizophrenia and, possibly, depression, anxiety and suicide, especially if there's a personal or family history of mental illness.*
- *Difficulties with relationships – at home, school or work.*
- *Physical health harms – including lung and respiratory problems from smoking cannabis.*
- *Addiction – cannabis can be addictive, especially for youth.*

SOURCE: [The Centre for Addiction and Mental Health](#) (2018)

Using cannabis, particularly during the adolescent years when there is an active developmental period of brain maturation, can influence mental health. The most well-known link is the risk for development (or worsening) of psychosis or schizophrenia. This is not to say that cannabis use causes schizophrenia, but rather earlier and longer exposure to cannabis, and use that increases over time, has been linked to triggering psychosis. Adolescent cannabis use that is frequent and heavier is a risk

factor for the later development of a psychotic disorder and is also a risk factor for earlier onset. Alternatively, psychosis may have never developed had a person not used cannabis. There is also evidence emerging that frequent cannabis use can have long term effects on anxiety as well as mood disorders such as depression and bipolar disorder. Further, by early adulthood, individuals who used cannabis as teens have higher incidences of suicidal ideation and suicide attempts. It is important to note that there is not one common cause of mental health disorders in general, but rather cannabis use at a young age can increase the risk of developing a mental health disorder, in combination with other factors such as genetics, environment, as well as the time period, duration, and other drug use.

What is considered “regular use”? This can vary, with the most common definition being once a week or more (CAP Monitor, 2018)

“Self-Medication”

Some adolescents may use cannabis as a way to cope with life stressors or relieve symptoms of anxiety, depression or other mental health disorders. It has been reported from cannabis users that they feel like marijuana helps not only relieve stress, but numbs uncomfortable feelings, enhances creativity, helps with sleep, and improves focus. If this “strategy” works for the person, and they believe it helps them cope with their particular circumstances, the chances of the behaviour continuing longer are increased. This leads to underdevelopment of healthier coping skills and can maintain use and therefore increase dependence, in turn potentially leading to addiction.

ADHD and Cannabis Use

One of the better known associations of a childhood diagnosis of ADHD is the increased risk for substance use, abuse or dependence in adolescence and adulthood. Self-reports of adults with ADHD show that cannabis use is the most commonly used drug, and often this use started during adolescence. One study found that 34% of adolescents receiving inpatient treatment for problems related to drug dependence (inclusive of cannabis) were diagnosed with ADHD. Research has also found that both the inattentive symptoms as well as the hyperactive-impulsive symptoms in childhood-onset ADHD were associated with a higher chance of marijuana use as a young adult. Some ideas as to why this may include the impulsivity symptoms of ADHD leading to substance use or, on the other hand, the negative effects of ADHD symptoms, such as inattention resulting in school, work, or relationship problems, may entice people towards drinking/drugs to

manage these negative symptoms. This ties into the self-medicating concept of untreated ADHD. People are not drawn to stimulant-like medications but rather to “downers” such as cannabis and alcohol. Furthermore, when people with ADHD use cannabis, related symptoms can actually worsen, such as lack of motivation, slower completion of tasks, slower reaction times and potentially causing problems with short-term memory, concentration, judgment and perception, all of which are also affected with ADHD. A take away message is that although children with ADHD may have a common biological risk for substance use, environmental factors at home, at school, and in peer settings appear to also influence the outcome. Also important to be aware of is evidence coming to light that ADHD medications and behavior therapies may acutely reduce adolescent substance use.

“Even as kids reach adolescence, they need more than ever for us to watch over them. Adolescence is not about letting go. It’s about hanging on during a very bumpy ride.” Ron Taffel (American Author)

What Can Parents Do?

Health Canada recommends starting the conversation with your teen early in order to educate them about drugs. This will allow you as parents to have an open conversation with them so they don’t go elsewhere, such as to friends or social media, and you can ensure the information is accurate. While this may seem a daunting task for some of us, there are resources available to help prepare for the conversation. Knowing your facts and preparing for an open-minded discussion is key.

Drug Free Kids Canada has published an amazing resource, a free downloadable package called “Cannabis Talk Kit: Know How to Talk with Your Teen” (available as a printed version from Health Canada or [online](#)).

Tips for talking about drugs

There is no script for talking with teens, but here are a few tips for talking with them about drugs:

- *plan the main points you want to discuss, rather than speaking on impulse*
- *avoid saying everything you think all at once*
- *look for opportunities to mention drug use, like when you discuss school or current events*
- *offer them control and let them pick the time and place*
- *give them room to participate and ask questions*

- *respect their independence*
- *respect their opinion*
- *avoid being judgmental*
- *listen to them, because if you are a good listener they may be more inclined to trust your input*
- *tell them you are trying to help them make good decisions by giving them information that they may not already know be clear about why you are worried and tell them that your main concern is for their well-being*
- *focus on facts rather than emotions*

As a parent, if your teenager is using drugs you may feel anger, sadness, fear or confusion. Those are natural reactions. But talking about the issue is more productive than talking about your feelings.

Mobile Family Crisis Support

Family crisis support is available both immediately over the phone and in-person at home. Mediated crisis family visits can be extended with repeat visits with the same counsellor. Support via text or chat is also available.

Extended Services: Our Mobile Family Crisis Support includes repeat visits with the same counsellor.

To access Mobile Family Crisis Support and/or Extended Services, please call 403-299-9699.

Y Mind!

We wanted to share an amazing program with you called Y Mind! Y Mind is a **FREE** 7-week mental wellness program for teenagers (13-18 years old). The program aims to support and provide resources for teenagers experiencing mild to moderate levels of stress and/or anxiety. Y Mind is grounded on Acceptance and Commitment Therapy (ACT) and Mindfulness and allows participants to learn more about different ways of how to manage their stress and anxiety. This program is facilitated by trained mental health professionals and there will always be two facilitators at each session. We have seen proven results nationally of reduced stress and anxiety related symptoms, increased overall wellbeing, and an increased ability to cope with difficult emotions.

Participants will receive a workbook of all the activities done during the program, so they can review and practice at home. We do provide snacks for participants during the program and meet other individuals experiencing similar feelings. Upon completion of the program, participants would receive a Certificate of Program Completion and a free 2-month YMCA gym membership as improving one's physical wellbeing has shown that it improved mental wellbeing.

Y Mind is generously supported by the Public Health Agency of Canada and the Alberta Government and allows us to offer the program at multiple locations throughout the city. The closest location to your school is the Remington Y.

Individuals can learn more about the program on their website (<https://www.ymcacalgary.org/y-mind-mental-wellness-program>) or complete a Formstack request (https://ymcacalgary.formstack.com/forms/ymind_intake_form_ymcacalgary) to sign up for our Information and Intake Sessions. Students 14 and older can self-register for the program without parental consent as well. Interested

individuals can contact our general Y Mind email if they have any questions at ymind@calgary.ymca.ca.

211

Call 211 to access an entire network of community, social, health and government services. Your call, text or chat will be answered by a professional 211 Community Resource Specialist who is trained to assess your need and refer you to the most appropriate service or services. 211 is available across Alberta and is offered in over 170 languages over the phone.

Why would I contact 211?

- I need food, shelter and/or transportation
- I need financial support to help pay my utility bill, rent and/or damage deposit
- I need to find mental support
- I need information on Government programs and phone numbers
- I don't know where to go for Legal support
- I want to volunteer for an organization
- I want to make a donation of furniture and/or clothing
- I am concerned about a friend or family member
- I am looking for services for a client
- We have access to thousands of other services

VAPING

A reminder that smoking, including the use of vape and its paraphernalia is strictly prohibited on public grounds. Any student found to be smoking or vaping on school grounds will be suspended and may potentially receive a bylaw ticket from Calgary Police Services.

VOLUNTEER POLICE CLEARANCE

To maintain the integrity of the CBE volunteer database and prevent it from becoming overpopulated, applicants are to process their PIC within a 60-day timeframe. Volunteers must apply either online with the Calgary Police Service or in person with a police agency within 60 days of the date of the CBE issued volunteer school letter. Volunteers who do not apply within the 60 days will be deleted from the CBE Volunteer Security Clearance Process database and the volunteer will be required to reapply.

All volunteers require valid CPS Clearance. Once cleared, volunteers are good for 5 years.

The process is as follows:

- Submit a completed Annual Volunteer Registration Form to the school;
- The information is then entered into the CBE Volunteer Security Clearance Process database by the school;
- A ePIC CBE issued volunteer school letter*is generated;
- The volunteer then takes this ePIC CBE issued volunteer school letter and goes online to the CPS Electronic Service's Electronic Police Information Check and completes the online application, making sure to share their clearance with the CBE as part of the process. You have a 60-day timeframe;
- The volunteer will receive an email notice of receipt of their application for clearance from the CPS;
- Several weeks will pass, and the CPS will send a confirmation letter on CPS Letterhead that a Vulnerable Sector Search has been completed and there is no further information to disclose.

We want to make sure to educate our parents about his process. Many of our new parents are still in various stages of “being processed”, having one or more of the steps 3-7 not being attended to or completed. Until your status indicates “cleared” in the CBE Volunteer Security database, you cannot volunteer at the school.

For your current school to check the CBE volunteer data base to see if you have valid police clearance, or to add you to the school's list of volunteers, we require their **full legal name & birthdate, including year born**.

*Note: the CBE issued volunteer school letter is not your clearance letter.

WHAT'S HAPPENING IN... ?

Students are now exploring the concept of Ihpipotosp.

1. *Kakyosin* / *Be aware of your environment; be observant*
2. *Ihpipototsp* / *Purpose for being here*
3. *Pommotsiysinni* / *To transfer something to others*

GRADE 6

Oki! Hello Parents and Guardians,

We have had an exciting week starting with the birth of our baby chicks. We have cuddled, played, observed, and loved our 19 chickens for the 5 days they were with us. Students have made some good memories from making them gifts to welcome them to designing homes for them. As we said goodbye to our chicks today, some students were sad, and some were ready to say goodbye.

Next week, will be quieter and perhaps we will complete more “academic” tasks. As the days are getting nicer, please make sure your child wears layers as we will be going on walking field trips around our community. Please make sure students are wearing shoes they will be okay walking in.

The days are getting longer and it’s nice outside which probably means that students are staying up later and playing outside. This means that students may be getting less sleep, which leads to a bit more irritability and students struggling to regulate their emotions. Please remind students that we want and need them to be at school. We have had a few conversations with classes around following the expectations of the school and classroom.

ELAL

In English Language Arts, we will take some time to celebrate our Hero's Journey stories that the students have been working so hard on!

We will also begin exploring a variety of forms of poetry in relation to our observations of the eggs and chicks, as well as seasonal changes in our natural world.

MATH

In math this we continue to finish work related to algebraic equations.

Please continue to work with your child at home around multiplication.

Here is math websites to practice multiplication:

<https://www.timestables.com/multiplication-flash-cards.html>

SCIENCE

We are starting our Trees and Forest unit and hope to be outside learning from the land.

SOCIAL STUDIES

In Social Studies, students will be exploring the origin stories, geography, and society of the Haudenosaunee Confederacy as a historical model of democracy. This exemplifies consensus, the third form of democratic decision making we will be studying this year.

GRADE 7

ELA

Students will do a reading comprehension post assessment task this week. They will also begin to explore the elements of a process essay in expository writing. There will be a focus on writing an introduction which includes a thesis statement. The *Daily Five* activities of reading, writing and word work will continue throughout the week.

MATH

Students will explore properties of circles by finding examples in areas of the school property. They will also measure the circumference and relate the measurements to find diameter and radius.

SCIENCE

Students will be investigating human impact on the ecosystem and the changes that occur due to interaction. The grade 7 students will be attending the field trip at the Wilder Institute/Calgary Zoo to explore the social dynamics, adaptations and interactions of various animals that call Asia their habitat.

SOCIAL STUDIES

This week in Social Studies, students will begin the final unit for the year. They will begin discussing and learning about Canadian Confederation, practising note-taking skills, writing paragraphs and complete a quiz at the end of the week.

GRADE 8

ELA

Students will continue to build their reading comprehension skills. They will also complete an independent project on text interpretation.

ELA Support - Wednesday at lunch in Room 109.

SCIENCE

Students will begin their Fresh and Saltwater Systems unit.

MATH

Students will be problem-solving this week in math and developing the formula for Pythagorean Theorem.

Math Support - Tuesday & Thursday at lunch in Room 108.

SOCIAL STUDIES

Students will create a Samurai Wanted Poster this week. They will also work through a Japan web-quest.

GRADE 9

ELA

Students will write their Part A: Written Provincial Achievement Test on Monday. They will also begin planning Community Asset and Adaptation project to showcase their learning from Library School.

ELA Support - Wednesday at lunch in Room 109.

ELA PAT: PART 1 - Grade 9 students write their English Language Arts Part A (writing) PAT on Monday, May 13th.

SCIENCE

Students will explore different types of biotechnology including cloning, GMOs, and bioengineering.

MATH

Students will review and study for their Scale and Congruency Unit Test on Wednesday.

Math Support - Tuesday & Thursday at lunch in Room 108.

SOCIAL STUDIES

Students will work on a film study on the movie, *The Founder*. This is in connection to their consumerism unit.

COMPLIMENTARY COURSES

What's happening in Computer Science?

A day in the life of a programmer:

I hate programming. I hate programming. I hate programming. It works! I love programming.

Coders should know one or more programming languages, the associated syntaxes, and useful keywords. A programmer, on the other hand, should know how to create algorithms and design solutions to given problem statements. Programmers should also be good with data processing and project management.

Students continue coding in Code Combat and then transition into their independent project designs in Computer Science. 3 submissions were made to the CBE for the Minecraft Level Up Calgary Challenge. Good luck to the finalists.

All students log into Code Combat and learn coding by using either Java (7's) and / or Python (8 & 9's), at the start of each class.

What's happening in Foods?

This week in Foods, our topic was "Cakes, Cupcakes and Muffins".

We discussed ways to prepare baking pans, the difference between a foam cake and a butter cake and the process of creaming butter and sugar in a bake.

In the kitchen, students made "Apple Cinnamon Coffee Cake Muffins" and they used a recipe that I developed. For fun, I develop recipes at home, test recipes and do food photography.

Many years ago, when I was doing my Food and Nutrition degree, I volunteered for Kraft Canada on a yearly summer basis, and I used to work in their test kitchen at Toronto Food Shows. It was a lot of fun!

The Apple Cinnamon Coffee Cake Muffins were a big hit and I think that students enjoyed the slightly cinnamon spiced muffin.

Seven weeks of school to go! Finish strong, get those projects in for your other classes, complete all course work and tell yourself that you WILL be successful. Enjoy the weekend! 😊

Lastly, a reminder about a program being offered through **the alex**.

Free Program – Teens Cook!

A poster for the 'TEENS COOK!' program. The title 'TEENS COOK!' is in large, bold, black letters. Below it, in smaller text, is 'Free program for teens ages 13-18'. The main body of the poster is an orange speech bubble shape. Inside, it says: 'Learn essential cooking skills in a fun and interactive environment. Discover new recipes and culinary techniques while building confidence in the kitchen and making delicious meals!'. Below this, it says: 'Priority is given to low-income individuals in the Greater Forest Lawn area'. At the bottom of the speech bubble, it says: 'The Alex Community Food Centre 4920 17 Ave SE'. To the left of the speech bubble, there are illustrations of various vegetables: a green onion, a yellow onion, a head of broccoli, a purple eggplant, and a head of green lettuce. To the right, there is an illustration of a bunch of green leafy vegetables. At the bottom left, it says: 'Every Wednesday from 5:00pm-7:00pm May 8th to June 26th 2024'. At the bottom right, it says: 'To register, call or text Ashley at 403-970-5473 or email airving@thealex.ca'. At the very bottom center, there is a logo for 'the alex community food centre' with a stylized sun or flower icon.

What's happening in Leadership / Training for Excellence?

Leadership

In Leadership, students have been practicing their public speaking skills by responding to questions pertaining to Mental Health Week. The theme for

Mental Health Week is 'Compassion'. The questions asked students when have they given compassion, received compassion, or practiced self-compassion in the past. Leadership students in Grade 9 have also been planning for Culture Day and their Grade 9 Farewell in June.

Training for Excellence

In Training for Excellence, students have been learning about the benefits of exercise on the brain in honor of Mental Health Week. Students learned that exercise could improve focus, mood, and self-esteem. Additionally, students came up with strategies to calm anxiety in high pressure moments, whether it be sports or academics, to achieve peak performance. Lastly, students also worked on their footwork by doing various drills with the agility ladder.

Business

In Business, students focused on interest rates and the power of compounding. Students learned how investing over a long period of time can allow compounding to build their net worth, as opposed to taking out credit card debt which can cause the power of compounding to shrink their net worth. It was emphasized to students that in personal finance, compounding can either work for you or against you.

What's happening in Construction?

Grade 6

Grade 6s are finishing off their magnet projects. Following this they will be given the chance to build some small decorations using scroll saws and MDF board.

Grade 7, 8, 9

Grade 7, 8, and 9s are working on their design and create projects. These are projects of choice for the students. Students are encouraged to pursue projects of interest. Some students are making candy dispenser machines, some are making cutting boards and even chess boards.

What's happening in Art?

Grade 7

Grade 7 artists continue to work towards creating a structure in 1-, 2- or 3-point perspective and are planning their good copies with the medium they will be using. Some students continue to develop an artist statement for the Red Dress Day MMIW art piece.

Grade 8 & 9

Grade 8 and 9 students continue to develop (and some are wrapping up their choice projects. We wish the artists at camp this week an inspiring trip to the mountains where they can soak in all the natural wonder.

PHYSICAL EDUCATION & INTRAMURALS

P.E.

Physical Education classes will be focusing on sports such as basketball, soccer, football, and softball over the course of the next month. Students will be heading outdoors if the weather permits, so please dress accordingly.

School Intramurals

Our lunchtime intramural program continues to be a source of great enjoyment for students and staff. The Physical Education team also provides open gym time in the morning starting at 7:30 am and ending at 7:55 am. Students are more than welcome to come and borrow a piece of equipment to play with during this time. We provide many opportunities to get active!

Intramural Schedule

Monday

Morning Open Gym (7:30am-7:55am)

Grade 6/7 Badminton Intramurals @ Lunch (12:05pm-12:30pm)

Tuesday

Morning Open Gym (7:30am-7:55am)

Grade 8/9 Badminton Intramurals @ Lunch (12:05pm-12:30pm)

Wednesday

Morning Open Gym (7:30am-7:55am)

Women's Wednesday @ Lunch (12:05pm-12:30pm)

Thursday

Morning Open Gym (7:30am-7:55am)

Grade 7-9 Badminton Team Drop-In @ Lunch (12:05pm-12:30pm)

Friday

No School
